DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones et al. (US 6,700,795 B1).

Pertaining to claim 1, Jones et al. discloses an integrated electronic module for vehicles (10) (column 3, lines 27-34), wire harness for the module structure (column 3, lines 60-67) comprising: a first printed circuit board (PCB) (108, see fig. 2) having fuses and relay circuits (see fig. 2) mounted thereon; a second PCB (110, see fig. 2) having input/output (I/O) terminals (122, 136, see fig. 2); and a PCB connecting unit (112, see figs. 2 and 3) for electrically connecting the first and second PCBs (108 and 110, see column 5, lines 18-37) which directly integrates the first PCB (108) with the I/O terminals (122, 136) of the second PCB (110); wherein the structure is constructed using one PCB-circuit integration connector (112) for each wire harness (see fig. 2).

Pertaining to claim 2, Jones et al. further discloses the connector comprises a multi-pole connector (112), and a circuit connected between the first PCB (108) and the I/O terminals (122, 136) of the second PCB (110), and a circuit connected between the

second PCB (110) and I/O connectors (122, 136) of the second PCB (110) are integrated in one multi-pole connector, and thus the first PCB (108) and the second PCB (110) can be constructed using one multi-pole connector for each wire harness (see fig. 2).

Pertaining to claims 3 and 7, Jones et al. further discloses the first PCB (108) is a junction box for vehicles. (Column 1, lines 15-24).

Pertaining to claims 4 and 8, Jones et al. further discloses the second PCB (110) is an electronic control module (column 5, lines 38-58) for vehicles (see figs. 2 and 3).

Pertaining to claims 5 and 9, Jones et al. further discloses the PCB connecting unit (112) is composed of connecting pins (column 5, lines 18-24).

Pertaining to claims 6 and 10, Jones et al. further discloses the connecting pins (112) are directly inserted into the first PCB (108) and into a part corresponding to the I/O terminals of the second PCB (110), then soldered (column 5, lines 18-24, and external injection molded parts are formed to have connectors that constitute a pair of male and female connectors (see fig. 2) together with the multi- pole connectors of the wire harnesses (see fig. 2).

Art Unit: 2841

Response to Arguments

2. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANDARGIE M. AYCHILLHUM whose telephone number is (571)270-1607. The examiner can normally be reached on (Mon-Fri from 8:30-5:00).

Application/Control Number: 10/593,374 Page 5

Art Unit: 2841

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-1984. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
